

National Care Society

- **Are you being stalked by multiple individuals?**
- **Is your residence being illegally entered when you are away?**
- **Are you experiencing muscle spasms, sharp pains, or headaches?**

Thousands of individuals nationwide are victims of domestic terrorism, covert harassment, discrediting campaigns, and neurological attacks (also known as gang stalking and electronic harassment). Victims are regularly stalked, rumors based on lies are spread about them within their communities, and they are subjected to neurological manipulation without their knowledge. This is a hate crime that is an attack on the integrity and self-esteem of the victim.
